

I Want to Believe

Thomas

If this goes on
I don't know how we'll survive
If this goes on
No one here gets out alive
If this goes on
Ignorance will drive us blind
If this goes on
I think I will lose my mind...

Going through life
Day after day
Wondering why
Searching for signs
Something to say
Everything's right

Caught in a downward spiral
Drifting away
Out on my own
Can't find my way

And even in the dark
The truth is never far
I want to believe
The secret's in the stars
And deep in my heart
I want to believe

Nothing is right
Everything's wrong
Most of time
Evil is good
Virtue a vice
Justice a crime

Where have the good ones gone to?
Where is the rage?
Robbers and fools
Guarding the cage

And even in the dark
The truth is never far

I want to believe
The secret's in the stars
And deep in my heart
I want to believe

Even though I'm jaded and tired
I still want to try
We'll never know the meaning of life
But we may find
A reason, a rhyme

Even though I'm jaded and tired
I still want to try
We'll never know the meaning of life
But we may find
That we're just alright

Something you said
Came back to me
Like in a dream:
Follow your heart
Not just your head
See where it leads

Live every waking moment
Like it's the last
Free from the future
Free from the past

And even in the dark
The truth is never far
I want to believe
The secret's in the stars
And deep in my heart
I want to believe
